

# Nagel Mietservice GmbH Collection

## Collection

1:50th Scale

**Above:**

*The combination make a nice set, but at a rather high retail price.*

**Above:**

*The colourful packaging includes both NZG and Conrad Company details and is a shared project.*

**N**agel Mietservice GmbH is a member company of the Nagel Group, specialising in the rental of construction machinery, industrial machinery and construction equipment to offer a comprehensive range along with the technical expertise to facilitate any construction

project. The fleet of machines are from market leading manufacturers, maintained at peak condition by highly skilled service engineers.

For a number of years, Nagel has introduced a scale model program with selected models decorated in the company's two-tone grey colours and fully marked up with the Nagel logos. Each limited edition version comes in a specially printed box and releases are usually timed around the Bauma trade show. For 2016, the model of choice is rather interesting, with both NZG and Conrad working on a joint venture which has resulted in a

set of two models, packaged together in a single box. The new Liebherr L546 wheel loader has been produced by Conrad and the updated version of the A918 Compact wheeled excavator is produced by NZG. The combination is certainly an interesting choice from Nagel and it is good to see two competing model producers working together. Both models have been reviewed in detail in issues 15 & issue 16 of PMMW in the standard Liebherr decoration. The model set is available to order from the Nagel merchandise shop (<http://shop.nagel-gruppe.de>)

**Above:**

*NZG's offering in the package is the updated A918 Compact wheeled excavator.*

**Manufacturer:** Conrad & NZG

**Scale:** 1:50th

**Star Rating:** ★★★★★

**Left:**

*The Conrad produced Liebherr L546 wheel loader is the latest design.*
